

Product Name	: Methyl 4-aminobutyrate HCl
Synonyms	: GABA methyl ester; Methyl 4-aminobutyrate hydrochloride
Cat No.	: M27562
CAS Number	: 13031-60-2
Molecular Formula	: C ₅ H ₁₂ ClNO ₂
Formula Weight	: 153.6
Chemical Name	: —
Description	: Methyl 4-aminobutanoate (GABA methyl ester) is a methyl ester compound derived from the condensation of aminobutyric acid and methanol.
Pathway	: Others
Target	: Other Targets
Receptor	: β -glucuronidase
Solubility	: —
SMILES	: Cl.COC(=O)CCCN
Storage	: (-20°C)
Stability	: ≥ 2 years
